

DATE: October 9, 1980

TO: Division File
(General)

FROM: Brad Benning

SUBJECT: Cook County Skokie/American Louver Co. (follow-up)

Mr. Gordon Knight was contacted on October 9, 1980, and plans for the removal of the remaining drums on the American Louver property were discussed.

Approximately 16 drums of hydraulic oil were taken by Chicago Petro Salvage a Licensed Special Waste Hauler (0618), to Motor Oils Refining Co. a registered oil reclaimer (site code-03117402). The remaining material, 63 drums of oil and water waste, 73 drums of varnish sludge, and 7 drums of liquid color will be taken to American Chemical Services in Griffith, Indiana for reclamation (site code-91808902). American Chemical Service is also a Licensed Special Waste Hauler and will be applying to Springfield for manifests and supplemental permits to transport the material to Indiana.

Mr. Knight stated that once all the drums are removed from the lot, they will begin clean-up operations along the railroad tracks to remove the spilled waste material.
